

# Environmental Manufacturing Policy

Cheminova wholly owned chemical services company regards the protection of environment from which it draws its resources and raw material as essential. All operations will be conducted with due consideration for the needs of the community and the environment. To ensure we have an effective environmental management system.

- » Ideally all aspects and impacts of our activity, products and services.
- » Set out an environmental management programme to manage, reduce or eliminate the significant aspects.
- » Identify and set legal and other facility requirements and ensure compliance
- » Identify and set out plans for the conservation of natural resources.
- » Ensure the conservation and promotion of biodiversity at and around the facility by reducing aspects that can affect these.
- » Ensure employee awareness and understanding of the environments and aspects by instituting appropriate training.
- » Reduce re-use, recycle and where not possible, dispose of waste in a responsible manner.
- » Encourage customers, suppliers, and contractors to behave in an environmentally responsible manner and implement environmental management system.
- » Supply information on the safe use, handling, storage, and transportation of chemicals.
- » Identify, respond and prevent environmental impacts associated with emergency incidents.
- » Ensure continual improvement by measuring the environmental management performances for reduction in the use of natural resources and pollution prevention.
